

I live in the Orlando area, and the local radio stations suck. I like to watch Fox News at home. But when I have to leave home, and get in my car, I will like to keep listening to news while I am driving. I am very disapointed with the local radio stations for not broadcast news more than music. That is why I bought my XM radio. To be informed not only at home, also in my car. So, it is the best thing ever invented. It will be a disapointment if the sevice ends. I am very pleased with XM satellite radio.
